

CX14

GREAT POWER AND STABILITY

The CX14 powered truck is available in several versions fitted with MOSFET technology. They are suitable for carrying loads on smooth floors and other surfaces. The small size and turning radius make the CX14 range ideal for work in areas where space is at a premium, such as lorries or narrow aisles.

Handle with control

- Large dimensioned Butterfly button control direction and speed.
- Double lifting command placed on both sides of the handle.
- Battery discharge indicator.
- Safety push button + horn located on top of the tiller head.
- Hour meter (Plus and Gel versions).
- "Turtle button" for creep speed to allow operation with the tiller in the vertical position for minimum turning space.

Traction battery

- The Plus and Gel versions have powerful traction batteries for better endurance. The strong battery cover, fixed by hinges, makes the access to the battery housing easier.

Stabilising wheels

- Two adjustable wheels allow ease of movement, even on the most difficult of surfaces. The wheels also provide great stability under all conditions.

BATTERIES AND CHARGER BUILT IN
